

Pentaferte Italia, part of a pool of companies operating in the medical and industrial automation industry, is leading in the production of medical devices for the hospital and pharmaceutical market; it cooperates with the major world leaders in the medical and pharmaceutical field, focusing on the infusion world.

The interaction between the various activities of the group converges towards a common goal: the development of new technologies aimed at achieving state-of-the-art production processes. The overall field knowledge, the specialization in different skills, the full integration of production and the control provided by the direct management of each phase - from design to marketing - in fact guarantee the overall quality of supply.

The synergy among the companies in the group increases the strength of Pentaferte Italia, a solid and reliable company, able to find effective and innovative solutions with high technological content for the specific requirements of the most demanding customers in Europe and all over the world.

Pentaferte Italia also designs and manufactures different products for third parties, taking care of every single production phase, from moulding to sterilization and transportation.

Located in **Italy**, Pentaferte operates worldwide. The activity of **design and manufacturing** is its "DNA" and over the years it has been able to follow and anticipate market development in terms of quality standards and demand of safety products in the medical world. Pentaferte has been the first company in the world to manufacture medical devices for Safety Enteral Nutrition, with the first reverse luer connector, in accordance with ISO Standard EN1615.

Given the extensive experience and flexibility among its manufacturing processes, Pentaferte addresses also to the B2B market, offering devices under customized design, with its own CE mark or Customer's one, with dedicated packaging as well as any other customization the customer may need, in compliance with Pentaferte technologies.

The **production site in Campli**, in the province of Teramo, 2 hours away from Rome, is one of the largest in Europe and is strongly investing in a deep revamping process in order to comply with the constant medical devices manufacturing requirements and the most demanding certifications in the world.
